Our New Waxflower Varieties Are Giving Growers A True Competitive Advantage.

Since 2008, Helix Australia has focused on helping growers maximise success in growing waxflower. It all starts with the right varieties.

Our sophisticated breeding program continues to deliver a pipeline of superior waxflower hybrids.

Our new waxflower varieties feature new colours, larger blooms, compact habit and extended flowering seasons.

Helix Australia invests in Plant Breeders Rights variety protection as well as a range of trade and consumer focussed promotional campaigns to drive demand for our superior genetics.
